

AMENDED IN ASSEMBLY JUNE 17, 2004

AMENDED IN SENATE APRIL 12, 2004

SENATE BILL

No. 1623

Introduced by Senator Johnson

February 20, 2004

An act to amend Section 100425 of, to add Sections 100701, 100702, and 100703 to, to repeal Sections 100710, 100715, 100720, 100730, 100735, 100740, 100745, 100750, 100755, 100760, 100765, and 100770 of, and to repeal and add Section 100700 of, the Health and Safety Code, relating to laboratories.

LEGISLATIVE COUNSEL'S DIGEST

SB 1623, as amended, Johnson. Laboratories: licensing and accreditation.

Existing law requires the State Department of Health Services to adopt and publish regulations to be used in approving and governing the operation of laboratories engaging in the performance of tests by or for law enforcement of blood, urine, tissue, or breath samples for the purposes of determining the concentration of ethyl alcohol in the blood of persons involved in traffic accidents or in traffic violations, including the qualifications of the employees who perform the tests, that the department determines are reasonably necessary to ensure the competence of the laboratories and employees to prepare, analyze, and report the results of the tests.

Existing law requires each laboratory in the state that performs those tests to be licensed by the Director of Health Services. Existing law requires the department to periodically inspect every approved and licensed laboratory. If the director orders the suspension or revocation

of a laboratory's license, the licensee is required to surrender the license to the director upon the effective date of that order. Existing law authorizes the director, after suspension of the license, to reinstate the license under prescribed conditions.

This bill would repeal all of the above provisions. The bill would instead require laboratories engaging in the performance of forensic alcohol analysis tests *by or for law enforcement agencies* on blood, urine, tissue, or breath for the purposes of determining the concentration of ethyl alcohol in persons involved in traffic accidents or in traffic violations to comply with various existing department regulations regarding inspection of laboratories, collection and handling of samples, methods of analysis, and laboratory records. The bill would prohibit the department from requiring laboratories to be licensed. The bill would require each laboratory to ensure that breath alcohol instruments and calibrating devices used in testing are listed in the conforming products list in the Federal Register by the National Highway Traffic Safety Administration of the United States Department of Transportation and would require all laboratories to follow the American Society of Crime Laboratory Directors/Laboratory Accreditation Board guidelines for proficiency testing, *and to meet other proficiency test requirements*.

The bill would require the department, on or before July 1, 2005, to establish a review committee that would be required to meet at least once in each 5-year period thereafter, or within 60 days of receipt of a request by the department or a member of the review committee, to evaluate and determine revisions to relevant department regulations. The bill would require the department to adopt *regulations to incorporate* the revisions determined by the review committee.

The bill would make additional conforming changes to existing law.

Vote: majority. Appropriation: no. Fiscal committee: yes. State-mandated local program: no.
